

2022 Preventive medications and your plan

Effective January 1, 2022

Managing your health with preventive medications

Your pharmacy benefit plan includes special coverage for preventive medications.

The drugs on your plan's preventive medications list do not have a deductible. This means you'll pay your copayment/coinsurance or nothing at all, depending on your plan.

To check the cost of any medication, call the number on your member ID card, visit your plan's website on your member ID card, or log on to the OptumRx app.

Potential savings with generic medications

To get the most from your benefits, ask your doctor if a generic medication is right for you. Generics normally cost less than brand medications, and the Food and Drug Administration (FDA) requires them to be just as safe and effective.

A list of covered preventive medications begins on the next page.

Medications are listed by therapeutic category. Where differences are noted between this list and your benefit plan documents, the benefit plan documents will rule.

For questions on injectable preventive medications administered by your doctor or healthcare provider, please call the number on your ID card.

Contents

Anti-addiction / substance abuse treatment agents	3
Anticoagulants	3
Antidepressants	3
Antineoplastics - drugs for cancer	3
Antiplatelets	3
Antipsychotics - drugs for mood disorders.	4
Bone resorption inhibitors	4
Cardiovascular agents - drugs for heart and circulation conditions.	5
Diabetes - antidiabetic agents	8
Diabetes - glucose monitoring.	9
Diabetes - insulins.	9

Refer to benefit plan documents to make sure listed medication is included in your benefit. This list should be used as a reference and may not include all medications. Brand or generic availability may not be current because of market changes. Using generics may be required based on your plan benefit.

Quality drives our decisions

To create this list, OptumRx is guided by the Pharmacy and Therapeutics Committee. This group of doctors and pharmacists reviews medications and coverage under pharmacy benefit plans. They also suggest which medications should be on your plan's preventive medications list.

Your health is important. Taking preventive medications as prescribed by your doctor or healthcare provider can help you avoid serious illness and high healthcare costs.
