## Important notice about the Columbia University Retirement Programs

#### Dear Participant:

Columbia University routinely looks for ways to improve the design and operation of the retirement plans it offers employees (collectively, the "Plans").<sup>1</sup> As a result of ongoing review of the Plans' investment options by the Plans' fiduciaries, changes are being made to the target-date retirement funds offered under the Plans. Please review this letter carefully to learn how your account may be affected.

Effective on or about **July 29, 2020**, the TIAA-CREF Lifecycle Funds will be replaced with the Vanguard Target Date Retirement Funds on the TIAA investment platform. The change to the Plans' target-date funds is occurring following a review of several criteria including active and passive investment strategies, asset allocation of the funds, appropriateness for the Plans' participants, and fees.

This change will affect only those participants who have elected TIAA as their provider for administrative and recordkeeping services. You will be able to access information about the Vanguard Target Retirement Funds through TIAA's secure website, just as you previously accessed information about TIAA-CREF Lifecycle Funds.

For those participants who do not make a specific investment election when enrolling in the Plans, the Vanguard Target Date Retirement Funds will be the Qualified Default Investment Alternative for each Plan.

#### Assets and future contributions:

If you have a balance in, or direct contributions to, the investment option listed in the left-hand column of the table on the following page, your existing balance in, and any future contributions to, this investment option will be moved automatically to the corresponding replacement investment option listed in the right-hand column of the table–*unless* you take action to direct your existing balance or such contributions to other investment options prior to **July 29, 2020**.

<sup>&</sup>lt;sup>1</sup>"The Plans" include the Columbia University Retirement Plan for Officers, the Columbia University Voluntary Retirement Savings Plan, the Columbia University Retirement Plan for Supporting Staff, and the Columbia University Retirement Plan - Supporting Staff Association at the College of Physicians and Surgeons.

# What are target-date funds?

Target-date funds are professionally managed investments designed for participants who prefer a single diversified option. Each of the investments creates a diversified portfolio within one fund, based on your expected retirement year (the "target date" of the fund). The fund's investments will gradually shift from more aggressive investments (stocks) to more conservative investments (bonds) as the target retirement date approaches. The principal value of a target date fund isn't guaranteed at any time, including at the target date, and will fluctuate with market changes. Target-date funds share the risks associated with the types of securities held by each of the underlying funds in which they invest. The target date represents an approximate date when investors may plan to begin withdrawing from the fund. However, you are not required to withdraw the funds at the target date. In addition to the fees and expenses associated with the target-date funds, there is exposure to the fees and expenses associated with the underlying mutual funds, as well.
