Q. WHAT IF AN EMPLOYEE IS SICK?

A. An employee sick with a fever and/or respiratory symptoms should not report to work. Time off due to sickness should generally be treated as a standard sick absence, unless the employee’s sickness is related to COVID-19 (see specific leave provisions below which cover COVID-related absences). Medical documentation may be required. You should work with Leave Management. Specific questions about how to code your absence should be directed to your HR Business Partner/Leave Management.

Keep in mind, employees should contact their healthcare provider if they experience fever, cough and have difficulty breathing, or have been in close contact with a person known to have COVID-19, or if they live in or have recently traveled to an area with ongoing spread. They can talk to their healthcare provider about recent travel or contact. Their healthcare professional will work with public health officials to determine if they need to be tested for COVID-19.
